

# I.D. Images PolarBond™ Adhesive

## Capabilities at a Glance

I. D. Images offers PolarBond™ in a variety of materials, including Direct Thermal, Thermal Transfer, and 2.6 mil White BOPP. We also offer an extensive range of custom capabilities to satisfy your label needs.

- With a low application temperature of -10° F (-23°C), and a wide service range, -65° to 150°F, PolarBond™ Adhesive performs exceptionally well within the demands of the food and beverage packaging industry.
- This powerful adhesive sticks quickly and stays in place, and assists the label in remaining extremely durable, despite product handling, freezing temperatures, or condensation.
- PolarBond™ is truly an all-in-one solution, performing just as well under the pressures of sub-zero temperatures as it does in warmer conditions. In addition to the food packaging industry, PolarBond™ Adhesive is also a solution for waxy and high recycle content corrugate, promotional labeling, and logistic warehousing.

### Applications:

- refrigerated & frozen food
- meat, poultry, & cheese packaging
- corrugate labeling
- waxy corrugate
- promotional labels
- logistic warehousing
- high recycle content corrugate
