For Immediate Release -Clarification

I.D. Images, LLC receives BS5609 section 3 approval for flexographic printing construction when GHS labels are required for overseas shipments

Brunswick, Ohio – January 27, 2016 I.D. Images LLC, a leading pressure sensitive label converter with headquarters in Brunswick, Ohio has received **BS5609** section 3 approval from Smithers Pira for a flexographically printed label construction.

I.D. Images received **BS5609** section 3 approval to print four specific ink colors; black, 185 red, reflex blue and yellow with a protective varnish on two Spinnaker Coating Polypropylene materials. These materials also have **BS5609** section 3 approval for thermal transfer printing with two ITW ribbons through a CAB XC6 printer. The ability to print static information with inks gives customers the additional flexibility to pre-print static information on chemical labels required to pass **BS5609** section 3 compliance and print additional specific chemical information through the CAB printer with an approved ribbon on an “as needed” basis.

In the US, OSHA set a June 2015 deadline for chemical manufacturers to use GHS compliant labels, a December 2015 deadline for distributors, and a June 2016 deadline for end users.

I.D. Images, a leading manufacturer of converted label products, specializes in providing label solutions from supply chain management to brand protection. The company serves varied markets including Transportation and Logistics, Food and Beverage, Consumer Durables and Healthcare and has facilities in Cleveland (Brunswick), Cincinnati, Chicago, Charlotte, California and Tennessee. I.D. Images sells exclusively through distributors.
