Customer Testimonial

“As Purchasing Assistant at our company, my daily work activity requires me to follow up on open POs in our system and be able to provide accurate information as far as shipping details and ETAs as to when the customer should receive product they are ordering and waiting on. When working with ID Images, I have gotten all of the feedback needed in order to provide my customer with satisfactory answers. Order confirmations are a huge part of the process in making sure that your company has received and processed our order successfully. Your order confirmations are always sent over in a timely manner, therefore we aren’t concerned whether or not the order has been processed.

Also, there have been a few instances in the past year since I have been in this position in Purchasing where there were rushed orders needed to get to the customer in a fast pace manner. ID Images has fulfilled that for us each and every time needed, which we appreciate strongly!

As a company, you have really supported us in every way possible to give our company the information needed to pass along to our customers to keep them happy. You make our job easier and much more enjoyable.

I would also like to thank you individually as you have helped me so much through this past year in getting me the answers needed, not to mention you are always so kind about it.

Thank you so much Megan, I truly do appreciate your help every day!”
