SH-400 Label Dispenser

The SH-400 ultra-economical, pressure sensitive label dispenser is perfect for labels up to 6 inch wide. Easy to adjust and requiring no tools, the specially designed, extra-sensitive micro-switch senses the edge of the label as it is fed and stops the motor exactly at the same point each cycle. The SH-400 works on all types, styles, and shapes of die-cut and butt-cut labels on a 1 inch or 3 inch core. Able to feed 240 inches per minute, the SH-400 has a high speed motor, small table top design, and a label waste re-winder for operator and work place safety.
