The SH-455 Economical Label Re-Winder uses a slip clutch and dancer arm to ensure consistent winding of thermal transfer, fan fold, and computer generated labels without concerns about breaking of the liner. Easy-to-use and requiring no tools or special operator training, the SH-455 has a small table top design, heavy duty motor and construction, and can reach speeds up to 120 rpm.

**Specifications**

**Machine**
- Length: 7.5 Inches
- Width: 11.5 Inches
- Height: 9 1/4 Inches

**Weight**
- 13.5 Lbs
